# About us

The Netelsan brand started its journey in 1989 with only one type of product. With 35 years of experience, nonstop working and investments, it has increased its product range to 5000 varieties in 8 different groups. In our factory of 16000 square meters, each of the 5000 various products are being manufactured in our automated machine parkours that completely designed by our engineers in terms of software and hardware; Plastic, glass, paint, electronic and metal molds. We carry out all our work-flow within the scope of ISO:9001 quality service management. Our products have CE, EN5 and TSE standards certificates that are valid in EU countries and all over the world. As Netelsan; as well as producing Switch Sockets, IP Video and Smart Security Systems, Video Communication Systems, Video Intercom Systems, Sensors and Sensor-fitted Luminaries, Emergency Exit Luminaries, Fire Detection and Security Systems, Burglar Alarm and Electromechanical Smart lock Systems; we are the first and only company in Turkey that produces and sells such a wide variety of product groups in its own factory. With our Netelsan branded product range, we can meet 80% of all weak current needs in a structure alone.
