PRODUCTION AND EXPERIENCE 37 YEARS

ABOUT US

NETELSAN began its journey in 1989 with just one product. Through 37 years of experience, tireless dedication, and continuous investment, the company has expanded its product portfolio to 5,000 items across 8 product groups. Each of our 5,000 products is entirely designed by our engineers, including its software, hardware, plastic, glass, paint, electronic and metal moulds, and manufactured in-house at our 16,000 m^2 factory using fully automated production lines. All our business processes are carried out in accordance with the ISO 9001 Quality Management System. Our products hold CE, EN5 and TSE certifications, recognised across EU countries and worldwide. NETELSAN manufactures switches and sockets, IP video intercom and smart security systems, video communication systems, video door phone systems, sensors and sensor-integrated lighting fixtures, emergency lighting and exit signage, fire detection and security systems, burglar alarm systems, and electromech anical smart locks. We are proud to be Turkey's FIRST and ONLY company to manufacture and offer such a diverse range of product groups entirely within a single factory. With our extensive product portfolio, NETELSAN can independently meet up to 80% of all low-voltage system requirements in a building.

PRODUCTION AND EXPERIENCE 37 YEARS

OUR MISSION

To provide safe, high-value living technologies wherever people live around the world, in every space enclosed by four walls.

netelsan®
a better way of secure life

OUR VISION

To become a technology company that continuously expands its domestic production capabilities while strengthening its brand value in the global market.

PRODUCTION AND EXPERIENCE 37 YEARS

MILESTONES

1989

- Netelsan A.Ş. began its journey in Ankara under the leadership of our founder, Necmettin Uzun, manufacturing intercom communication systems.

2006

- Sensor-integrated lighting fixtures and motion sensors were added to our product portfolio.

2009

- Our Antalya Regional Office was established.

2010

- Video communication systems were added to our product portfolio.

2011

- Our OBSIDIAN doorbell panel received the Silver Award at the A' Design Award competition in Italy.

2012

- Emergency lighting and exit signage fixtures were added to our product portfolio.

2016

- Fire detection and alarm systems were added to our product portfolio.
- We commenced production at our newly completed 16,000 m^2 factory in Sincan, Ankara.

2017

- Smart lock systems were added to our product portfolio.

SWITCH AND SOCKET USAGE AREAS

It is used wherever there is a living space, from hotels to hospitals, from dormitories to gas stations. Thanks to its water-based paint feature, it does not contain solvent structures that could negatively affect human health, making it a preferred choice with peace of mind. Due to its antibacterial feature, it does not harbor bacteria on its surface.

It holds ISO 9001:2015 and TSE certificates and is regularly tested by TSE. It has successfully passed 40,000 on-off switching tests.

IP INTERCOM SYSTEMS

The newest products of developing technology: IP Video and Smart Security Systems. With its superior technology, facial recognition feature, high-sensitivity touchscreens, and energy-saving features, even if you forget your password, it will never forget your face!

NOTHING ESCAPES YOUR SIGHT (WALL SCONCE)

Sensors and sensor-controlled lighting fixtures with adjustable sensitivity make our daily lives elegant with different color options.

Designed with the latest technological developments, sensors and sensor-controlled lighting fixtures show a quick reflex even to the smallest movement thanks to their 180° and 360° detection areas.

HF Radar Sensors have high frequency and can detect movements even behind walls. For users who want to eliminate the visibility of the sensor, it features the ability to be embedded into the lighting or ceiling.

OUTDOOR SIREN AND STROBE
When detection occurs in detectors, it switches to alarm mode with a high sound and its strobes become active. You can connect up to 2 outdoor sirens.

MAIN CONTROL PANEL
It is the main control panel of the burglar alarm system.

KEYPAD
It is the password entry keypad of the burglar alarm system.

WINDOW MAGNETIC CONTACT
When the alarm is armed, it warns the alarm control center when doors and windows are opened, triggering the alarm. You can connect as many magnetic contacts as you want outside the package

PIR MOTION DETECTOR
Instantly detects movement and heat. It detects the person or persons in motion and immediately gives an alarm. You can connect up to 40 PIR sensors.

BURGLARY IN NUMBERS

According to calculations based on Turkish Statistical Institute (TSI) data, the number of individuals entering correctional facilities has increased 3.8-fold over the past 11 years.

The most recent data published by TSI in November 2020 belongs to the year 2019. Accordingly, 281,605 people entered penal institutions in 2019. This figure was 74,404 in 2009.

Based on these data, the number of individuals convicted of burglary showed a 7-fold increase in 2019 compared to the year 2009.

SAFE LIVING STARTS WITH NETELSAN

DETERRENCE

Burglar alarm system detectors and sensors instantly detect an intruder trying to enter your home or workplace and scare them away with a high-decibel alarm sound. They deter the burglar by flashing their strobes.

INSTANT NOTIFICATION & REMOTE CONTROL SYSTEM

In the event of a burglar alarm, you are notified of the situation through notifications sent to your mobile phone and email. With the remote control system, you can check from your phone which alarm is sounding.

SECURITY

Following these notifications, you receive a call from the alarm system. After receiving information about the situation, the police station closest to your location is called, and police teams are dispatched to your address.
